OFFICE 1

OFFICE 2

OFFICE 3
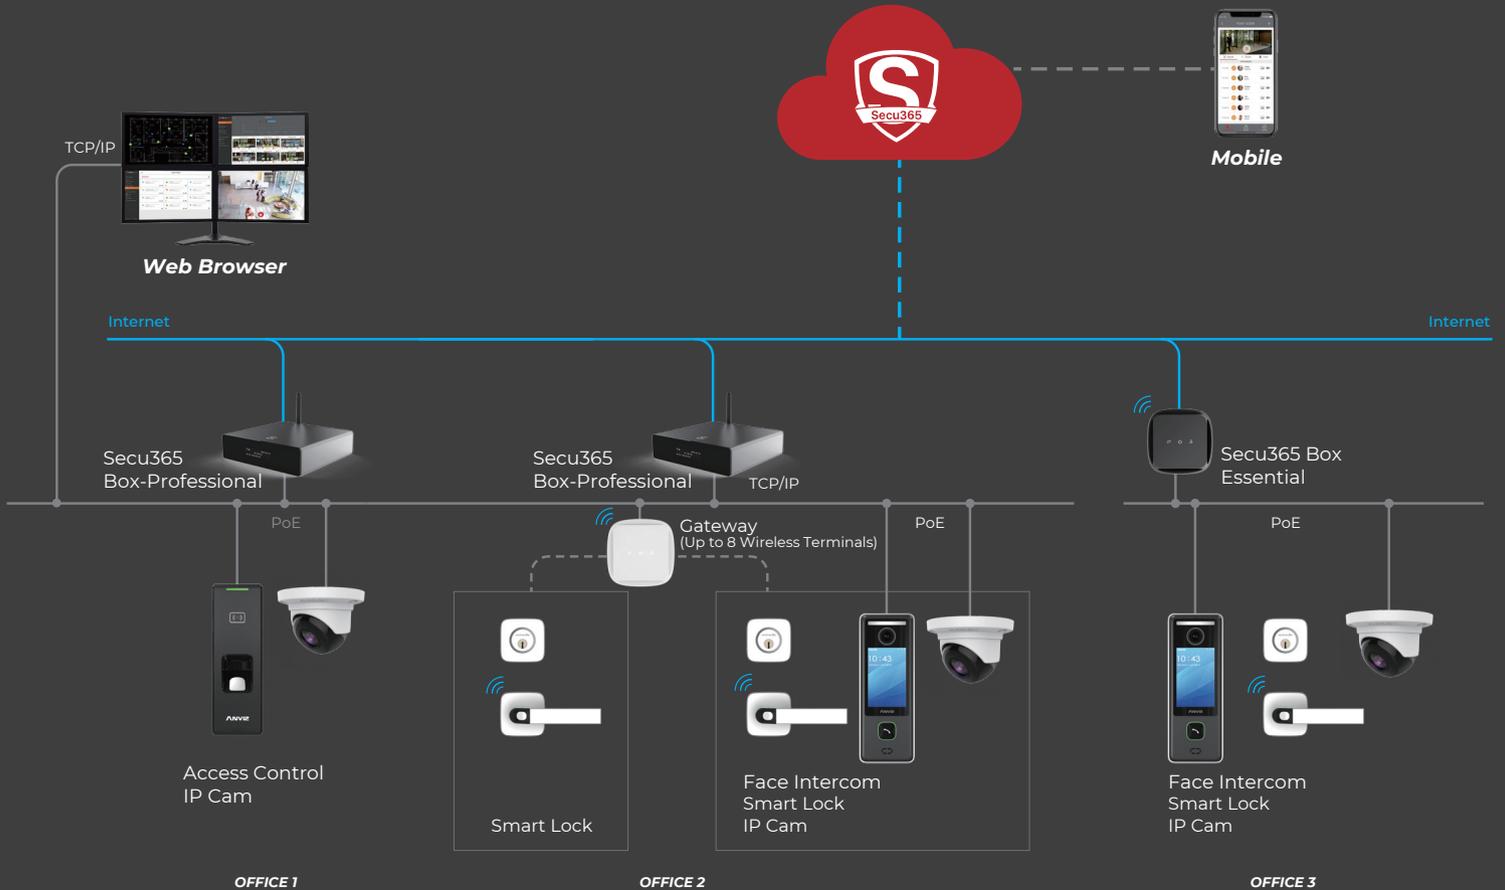

One unified security platform

It seamlessly integrated access control,video surveillance,intercom and building sensors into one intuitive solution.

Your body is your ID

Through giving your body a unique ID, Biometric authentication will make your life more safe and convenient.

Flexible management system

Secu365 offers both local web browser and moblie APP to manage the system.

Your office on your phone

Simply through Secu365 mobile app. you can check records and easily control everything in the system at anytime anywhere.

How Secu365 Protects You

Secu365 will provide full range of protection for a medium site, from the main entrance, reception area, IT and financial room, and the perimeter area. You can majorly use a control center to realize one stop monitoring of your site and control everything from the cloud.
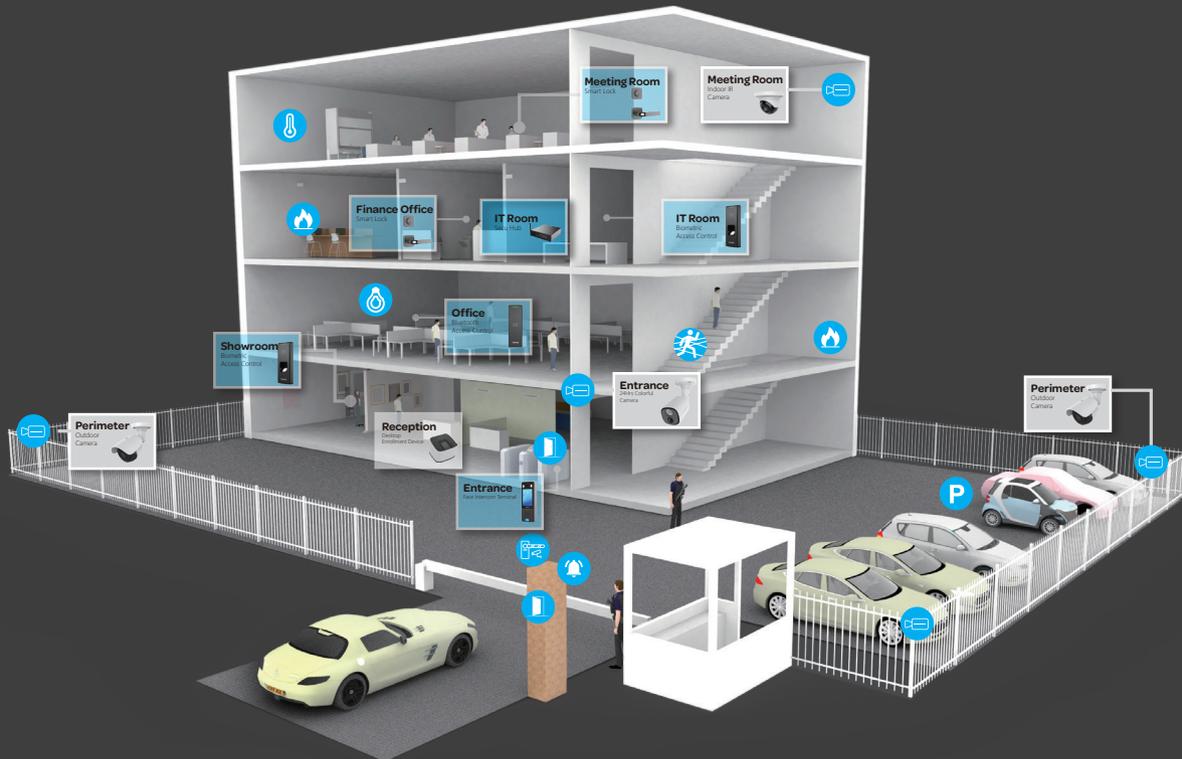

Web-based management system

Secu365 web system allows you to monitor and control all security spots from entrance area to every inside corner guarded by security terminal devices.
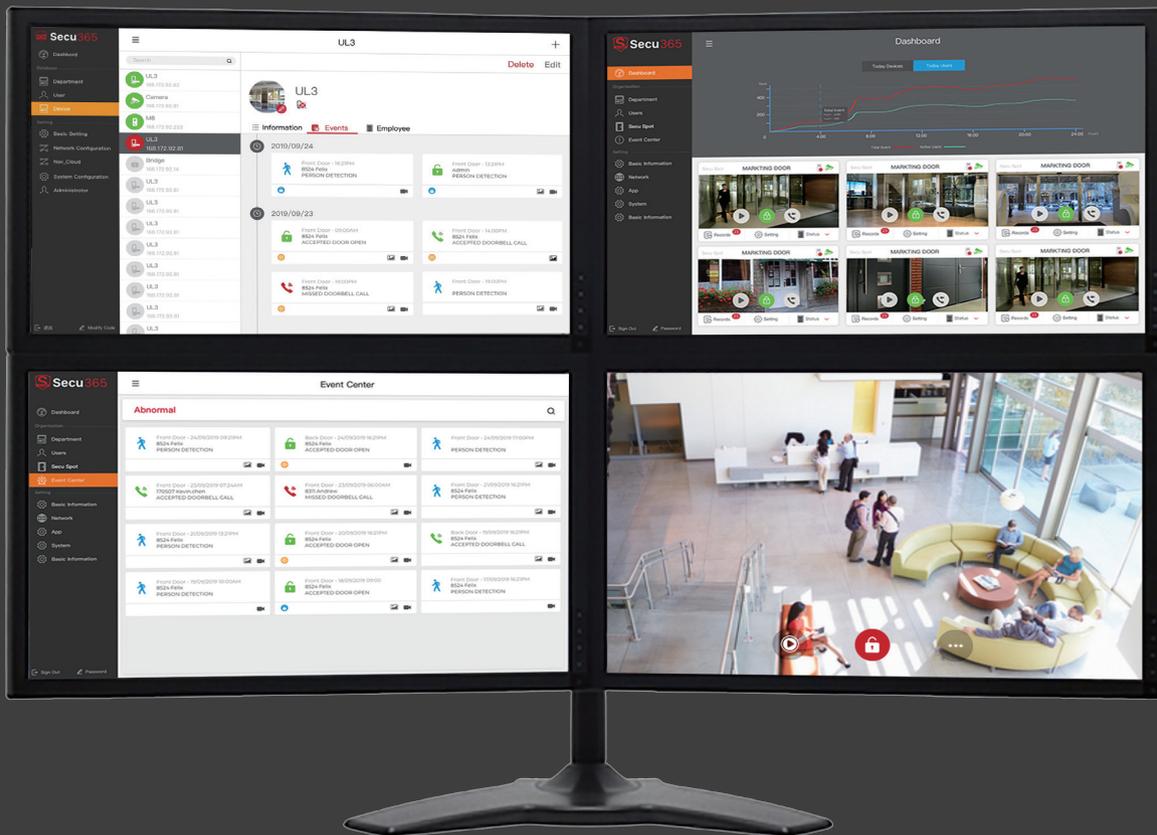

Keep secure on your phone

Need to access your security systems while you are on a trip. Secu365 mobile app will provide you such a lifestyle.

Remote Access Control
You can realize remote access authorization, and remote door opening.

Video Management
You can get all key spots under monitoring and get all visible events.

Remote Intercom
Any of your visitor can realize one click remote call to you and you can give him the remote access right.

Event Alert and Push
Any Event and alerts will be pushed to your mobile phone and you will not miss any threatening issue.

Centralized Management
You can realize the centralized control for all security issues from multiple sites.
