Warning

- The default password is used for your first login. To ensure account security, please change the password after your first login.

- To avoid electical shock, do not open the cabinet. make sure the device is installed and fixed by professional engineers.

- Make sure the power supply voltage is correct before using the camera. otherwise it may cause damage to the device.

Notice

- Please check if all the items on the package list have been included in package.

- This equipment must be installed and used in strict accordance with the instructions given in the user documentation. This equipment contains no user-serviceable components. Unauthorized equipment changes or modifications will invalidate all applicable regulatory certifications and approvals.

- Video and audio surveillance can be prohibited by laws that vary from country to country. Check the laws in your local region before using this product for surveillance purposes.

- When transporting the Anviz product， please use the original packaging or equivalent to prevent damage to the product.

- Do not touch the CCD (CMOS) optic component directly. You can use the blower to clean the dust or dirt on the lens surface. Please use a dry cloth wetted by alcohol to wipe away the dust gently if it is necessary to clean.

- Please don't aim the device at strong light (such as lighting, sunlight and so on) to focus; otherwise it may cause overexposure (It is not the device malfunction), which will affect the longevity of CMOS.

- Always use the dry soft cloth to clean the device. If there is too much dust, please use the water to dilute the mild detergent first and then use it to clean the device. Finally use the dry cloth to clean the device. Don't use volatile solvent like alcohol, benzene, thinner and etc or strong detergent with abrasiveness, otherwise it will damage the surface coating or reduce the working performance of the device.

DM(Device Manager) software can automatically search the IP address of network cameras in the same local area network.

Note:
You can download the IP Search software from the URL:
http://www.anviz.com/download/dm.zip

1. Install the DM software, and then click "Search" button.

3. Input new IP address, subnet mask and gateway, then click "Apply" button to keep the modification.

2. Choose the camera, and click "Network" button.

Default configuration of IPC:

IP address: DHCP

User name: admin

Password: admin

Note： If there is no DHCP server in the network， the default IP is 192.168.100.100， otherwise the device will automatically acquire IP address from the DHCP server .

Take Windows7 and IE10 for example.

1. Input the IP address of the camera in address bar and press [Enter].

2. Input the "Username" (admin) and "Password"(admin) in the dialog box, and click "OK".

Windows Security

The server 192.168.100.100 at IPNC requires a username and password.

Warning: This server is requesting that your username and password be sent in an insecure manner (basic authentication without a secure connection).
