# C2C
Color RFID Time Attendance

EM | MiFare

ARM system platform, HD LCD

C2C is the color RFID attendance system designed for medium or large size enterprises. It integrates High Definition TFT LCD and ARM system platform to ensure a stable performance . C2C has an ultra slim design with the thickness of only 3cm, which makes it extremely elegant on the wall. Stylish 3" widescreen High Definition TFT display can show multi-languages for different local market. Stardand RFID reader, optional Mifare card reader are specially designed for the existing card users and higher security level. In addition, with the unique Fn button, users can have great convenience to manage complicated custom-defined work code or time attendance status in practical situation.

BioNANO®

Core Algorithm

Fingerprint - Facial - Iris

Fast fingerprint scan in less than 0.5 second

| HD Color | Mini USB slave | USB Flash Drive Host | Inbuilt Proximity Card Reader | Super Slim | Self-Service Record Inquiry | Network IP Connection |

⊕ Feature

— Extremely thin and refined design

— 3" widescreen High Definition TFT display

— User friendly graphic interface

— Support multiple display and software languages
