

# Anviz Global and Aliar11 Accepted Conaprole's Challenge

The research and development department at Anviz Global has partnered with Aliar11 to design and implement a fully-customized biometric-based, time-attendance system to meet the needs of their latest partners, Conaprole. Anviz enthusiastically accepted the challenge of supplying Conaprole, one of Uruguay's biggest and most internationally-recognized dairy producers.

## Installation site:

All of Conaprole's manufacturing and office facilities across all of Uruguay.

## Project Background:

After one year of cooperation, the project has been qualified as a complete success. Anviz's OA1000II terminal has been installed in 40 locations. The system has been operational since May of this year.

## Project Requirements vs. Anviz Solutions:

Requirements:

- 1) User-friendly biometric technology.
- 2) High-quality and reliable hardware which is capable of handling a high volume of employees.
- 3) Sophisticated firmware capable of handling complex time-attendance functions
- 4) Highly compatible software that integrates easily with Conaprole's unique time-attendance database
- 5) External project hardware integration.
- 6) Durable casing that includes mini-UPS and converters.

### **Anviz's State-of-the-Art Solution for Conaprole:**

- 1) Advanced BioNano algorithm
- 2) Fully-sealed water-proof and dust-proof outer casing and sensor.
- 3) Durable outer casing
- 4) Anviz's customized firmware
- 5) Anviz's easily adapted software to meet Caniprole's needs

Anviz Global Inc. is a pioneering company in the intelligent security industry. The U.S.-based company specializes in Biometrics, RFID and Surveillance devices. The company has been providing solutions to a broad range of partners in commercial, industrial, and governmental sectors.
