Installation Instructions

L100KD/L100D

Product And Accessories

Outside panel

Inside panel and battery cover

RFID cards (L100D) and Emergency keys

2 Rubber mats and 1 mounting plate

Dead Bolt

Lock Spindle, Screwdriver and fixing Screws (4 long screws for outside panel mounting, 2 short screws for inside panel mounting, 2 short screws for bolt fixing.)

-1-

Installation

► Step 1
Insert dead bolt into the door as shown in diagram. Make sure the arrow points up. Fasten the screws. * See Note 1

► Step 2
Install outside panel with rubber mat on door, and route the wire through the hole over the dead bolt. * See Note 2

► Step 3
Install Mounting Plate with Rubber Mat and route wire through left hole. Install four screws on the Mounting Plate to fix the position. Recommend: DO NOT OVER TIGHTEN the two screws above.

► Step 4
Keep outside panel in unlock status. Insert the lock spindle through the dead bolt and make sure the lock spindle plugs in the outside panel.

► Step 5
Remove the above 2 screws installed on mounting plate. Adjust the knob as shown in "Thumb Turn". Connect wire from the Outside panel to Inside panel. Adjust the outside knob in order that lock spindle is inserted into thumbturn vertically. * See Note 3

► Step 6
Fasten four screws to fix the inside panel. Turn the knob to make sure that you can push the dead bolt. Install alkaline batteries and battery cover.

Note 1: Make sure the hole dimension is fit for bolt installation (Refer to chapter "New Door Preparation").

Note 2: Make sure the bottom screw rod get through the holes in dead bolt.

Note 3: Make sure the knob in the right position as it shown in "Thumb Turn".

New Door Preparation

1 Mark Door

Choose 60mm or 70mm (2 3/8" or 2 3/4") backset and use installation template to mark the holes on door face. (Installation Templates provided)

2 Drill Holes

Drill appropriate holes (53mm, 26mm, 2*7mm) as indicated on installation template.

3 Install Latch

1) Insert Dead Bolt to the hole and keep it parallel to door face. Mark outline of reinforcement plate and remove the dead bolt.

2) Chisel 3mm (1/8") deep until the face palte is fill with door edge.

3) Mark and mortise jamb for strike location. Chisel 3mm (1/8") deep until the face palte is fill with door frame. And chisel about 12mm (1/2") deep for bolt.

New Door Preparation

4 Adjust backset length

1) Default length is 60mm.

2) Turn the PIN (in 60mm) into the bolt housing. Pull bolt mechanism out of housing and turn the PIN to position 70mm.

3) The backset is 70mm (2 3/4") long.

The products are subject to change without notice.
