**Features:** Compact Design, Fingerprint+Card, Infrared auto wakeup sensor, TCP/IP, Wiegand input & output, Direct lock control, Time zone access control, Doorbell output, Tamper alarm, Door sensor

**Software:** Anviz time attendance and access control software

**Project requirement:** High security, complete access control solution, concentrate management & control

Anviz VF30 Fingerprint + card + password access control system, plus Anviz OA99 fingerprint reader, and kinds of Anviz accessories such as electric lock, exit button etc. together with Anviz software, offer a perfect solution for the access control and time attendance for this whole commercial building and nearly 20 offices in the building.

All the VF30 in the building communicate each other by TCP/IP, authorized users just register and enroll their fingers with Anviz OA99 in the management desk of the building, then their fingers will be transferred to all the relevant VF30 machines through

communication setup via Anviz software. Then the users immediately can open the door in the main entrance, in the garage, in his office floor etc. by placing his finger in the VF30 machine. And for each office, the VF30 not only guarantee a high security for office access control, but also offer a time attendance for the employee daily attendance!

We are really satisfied with Anviz complete solution, all of them, each of them!--Said the guide of the management desk of the building.

Moreover, Anviz Argentina new office is located in the 6th floor of this building. We warmly welcome Anviz clients have a visiting to Anviz Argentina Office together with the case study there.
